

Subject:	CryptoAI - Lift off!
Date and place:	Sunday 21 January 2018 19:00- 20:30 CET- Discord - CryptoAI channel
Present:	@lanj (THE MACHINE), @Oscar Alsing, @Dennis, @deeptrader, @Bluelight, @PS, @Arnold, @Ron

Agenda:

- Questions about the last meeting minutes:
- Discuss the Minimal Viable Product (MVP):
- Do we want to make a money of the product?
- Review current activities on Trello Board:

<https://trello.com/invite/oscaralsingcommunity/19cee46285fffc6e4a87360e198e517a>

Notes:

- **Questions about the last meeting minutes:**
 - No questions.
- **Discuss the Minimal Viable Product (MVP):**
 - Interactive simple interface:
 - **Action @Ron:** Ask @Sarah if she can make a design.
 - Information of the project:
 - What we're doing.
 - Why we're doing it.
 - How we're doing it.
 - ICO list:
 - Scrape the website with the links to the sources + create a objection button.
 - Create a mailing list option via Mailchimp.
 - SEO stuff
 - Keywords people are searching for on google e.g.
- **Do we want to make a money of the product?**
 - Yes we want to make money out of it.
We can let pay ICO for the listings on our site.
- **Review current activities on Trello Board:**
- **Play Framework:**
 - @lanj didn't had time to finish the Play Framework yet but will try to finish it upcoming week.
- **Other notes:**
 - During data processing we need to do pre-processing to put labels on the data what we have.
 - **Action @Oscar Alsing:** Give rights to everybody to update the GitHub Knowledge base.
 - **Action @EVERYONE:** Give your GitHub usernames to Oscar to get access rights to the Knoledge base.
 - Add to the Knowledge;
<https://coinmarketcal.com/>
 - **Action @lanj:** create an overview of what we have scraped for the coins atm and feed it into the Play Framework.
 - DNS name: we will discuss this next week:
 - CryptoIndicators.io
Action @PS: check the social media platforms to see if "Cryptoindicators" is available.
 - Create a separate DNS for the ICO listings. Maybe also a seperate server.

- Can we use put a database on the server? **@lanj** says it's possible as long as it doesn't eat up too much.
- **Action @Ron:** create a private Slack channel for classifide information about the project
- **@EVERYONE:** help us by getting active on Reddit and supporting our posts.
- ICO listing:
 - Premium (subscription) to give a video and extended info about the ICO.
- We'll do the next meetings at 14:00 CET.
